

I do not assume to know how to resolve the concerns that have resulted in the consideration of introducing LPFM which could take priority over current FM translator services. I listen to K-love radio stations and am very saddened that a decision could be made that would remove a station that help people come to know God, that he loves them and can help us live in community as he desire us to. As a community station isn't that a goal? The government is noticing faith based programmes make longer lasting improvements in our communities. I ask you to please consider other alternatives. Thank you for governing us.
